

OHIS Adapters, Consoles

The **Open Headset Interconnect Standard** brings flexibility to the connection between you and your radio.

OHIS Ecosystem:

OHIS adapters convert proprietary headset and radio interfaces to a standard interface. Any OHIS User device can connect to any OHIS Radio device.

Learn more at: ohis.org

HHI Radio Pro Adapter:

The Radio Pro makes any radio OHIS compliant.

- Fully configurable to work with any radio.
- Passthru ports preserve the radio's native microphone, headphone/speaker, and PTT ports.

HHI User Pro:

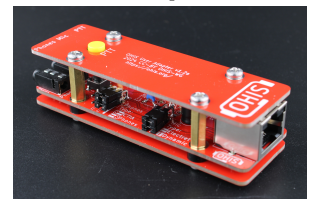

User Adapters:

User Adapters make any headset OHIS compliant.

- Works with Dynamic or Electret Microphones.
- Built-in PTT button so they can be used as a handheld PTT.
- **User Pro** is fully assembled, **OHIS User Adapter** is a kit.

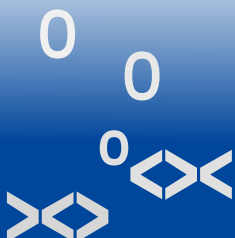

Open Source User Adapter kit:

HHI Contesting Console:

Connects two OHIS users to one OHIS radio, with an Intercom.

- Each operator has their own 4 channel mixer: Radio, Intercom, Sidetone, Ambient.
- Whichever operator presses their PTT, their microphone is sent to the radio.
- No more pulling your headset off your head to talk to your logger.
